12 km west of Onslow

The Wheatstone Project, Australia’s first third-party natural gas hub, is located in Western Australia.

8.9 million tonnes

The expected LNG production from Wheatstone per annum at full capacity.

225-metre tall platform

The offshore platform is one of Australia’s largest, more than two times taller than the length of an Australian rugby field.

70 m

The offshore platform stands on a steel gravity substructure in 70 m of water.

225 km of pipeline

Natural gas is carried from the platform to the onshore plant site in 225 km of pipeline, nearly long enough to cross Tasmania.

about 320,000 cubic metres of concrete

The amount of concrete used to build the LNG plant was enough to fill 128 Olympic-sized swimming pools.

340K tonnes

The pipeline weighs 340,000 tonnes.
